

MINERAL COMPOUND FERTILIZERS FOR SPECIFIC CROPS OBTAINED BY PHYSICAL COMPACTION

tional requirements even of the most demanding crops.

The effectiveness of these products is improved by the granular formulation obtained through compaction, a dry granulation process borrowed from the pharmaceutical industry that uses mechanical compression to agglomerate the particles of the raw materials. This allows for granules to be obtained without adding solvents, which can have a negative impact on the final solubility of the product. The compacted granules rapidly dissolve in the ground allowing a fast nutrients' root uptake, making these fertilizers very efficacious. Low Chlorine Content (LCC/BTC) formulations are also available that couple all the advantages of the NPKs with the quality of Low-Chlorine Potassium (< 2%), which is the best quality of potassium.

K-S 30 B.T.C. is the fertilizer of the K-SPECIAL VIGNETO-FRUTTETO LINE with a nourishing and fortifying action, to be used in one / two applications divided between autumn and vegetative restart. Particularly suitable for all chlorine sensitive crops.

CROP	TIME OF APPLICATION	DOSE/HECTARE*
Small fruits (Blueberry, Blackberry, Currant, Raspberry), Horticultural crops, Tobacco e Beets, Grapes, Citrus (Tangerine, Lemon, Orange, Bergamot, Clementine) e Strawberries	Pre-transplanting/sowing fertilization, Post-transplanting/sowing fertilization	400-800 kg

COMPOSITION		PHYSICO-CHEMICAL FEATURES	
Potassium oxide (K ₂ O) total	30.00%	GRANULAR	
Potassium oxide (K ₂ O) soluble in water	30.00%	METHOD OF USE	
Magnesium oxide (MgO) total	8.00%		
Magnesium oxide (MgO) soluble in water	8.00%		
Sulfuric anhydride (SO ₃) soluble in water	26.00%	Cover fertilization	Pre-sowing fertilization

PACKAGING: 25 KG - PALLET 1500 KG, BIG BAG 600 KG
