

# NPK 11-22-16 B.T.C.

## COMPOUND FERTILIZERS (BINARY, TERNARY AND TERNARY B.T.C.) OBTAINED BY PHYSICAL COMPACTION

The K-FERT COMPLESSI LINE includes a wide range of granular mineral fertilizers characterized by the presence of two (BINARY COMPLEXES) or three (TERNARY COMPLEXES) macroelements (nitrogen, phosphorus, potassium), most of which enriched with sulfur (as sulfuric anhydride,  $\text{SO}_3$ ), considered the fourth most important nutritive element due to its role in plant nutrition.

The granular formulation of these products is obtained through compaction, a dry granulation process borrowed from the pharmaceutical industry that uses mechanical compression to agglomerate the particles of the raw materials. This allows for granules to be obtained without adding solvents, which can have a negative impact on the final solubility of the product. The compacted granules rapidly dissolve in the ground allowing a fast nutrients' root uptake, making these fertilizers very efficacious. Low Chlorine Content (LCC/BTC) formulations are also available that couple all the advantages of the NPKs with the quality of Low-Chlorine Potassium (< 2%), which is the best quality of potassium.

NPK 11-22-16 B.T.C is a TERNARY NPK B.T.C. COMPLEX of the K-FERT COMPLESSI LINE, particularly suitable for chlorine sensitive crops. Its macroelements (NPK) ratio shifted towards phosphorus and potassium makes it suitable for applications on all crops at the beginning of vegetative development, when the plant requires high amounts of phosphorus to promote the growth of the root system. It can also be used at pre-flowering and post-fruit setting, to increase flower fertilization and improve fruit development.

CROP	TIME OF APPLICATION	DOSE/HECTARE*
Horticultural crops e Fruit crops, Industrial crops e Beets e Citrus	Pre-transplanting/sowing fertilization, Post-transplanting/sowing fertilization	300-800 kg

COMPOSITION	
Total nitrogen (N)	11.00%
Ammoniacal nitrogen (N)	6.00%
Ureic nitrogen (N)	5.00%
Phosphoric anhydride ( $\text{P}_2\text{O}_5$ ) total	22.00%
Phosphoric anhydride ( $\text{P}_2\text{O}_5$ ) soluble in water	9.50%
Phosphoric anhydride ( $\text{P}_2\text{O}_5$ ) soluble in neutral ammonium citrate and in water	12.00%
Phosphoric anhydride ( $\text{P}_2\text{O}_5$ ) soluble in mineral acids	10.00%
Potassium oxide ( $\text{K}_2\text{O}$ ) total	16.00%
Potassium oxide ( $\text{K}_2\text{O}$ ) soluble in water	16.00%
Sulfuric anhydride ( $\text{SO}_3$ ) soluble in water	11.00%

PHYSICO-CHEMICAL FEATURES		
GRANULAR		
METHOD OF USE		
	Cover fertilization	Pre-sowing fertilization

**PACKAGING: 25 KG - PALLET 1500 KG, BIG BAG 600 KG**

\*The choice of the dose is subordinated to various factors and can be varied when necessary. All applications can be repeated in relation to the different crop needs. You can contact our Technical Service for the correct application on specific soils and under specific climate conditions.\*
